## 1. INTRODUCTION

#12#

Articles published in this journal should contain new original materials and information.

Authors of publications in journal do not get honorarium and also agree with the publication of articles in the printing version of the journal and also in the internet - version.

Responsibility for use of photos and drawings in the sent materials of articles lays on authors.

#12#

#12#

## 2. CHAPTER TITLE, BOLD TEXT, ALIGN TEXT LEFT, CAPITALIZED

#12#

Present instruction is an example of an article text. The article should be prepared in Word text editor. Wherever where no special indications, Times New Roman 12-points font is obligatory. Single line spacing. First-line indent of each paragraph: 0,5 cm. Symbols #12# determine blank lines of a given height.

The article should include 4 to 12 pages of text together with figures, tables and literature. An even number of pages (6 or 8) is preferred.

Basic text may be written in English.

Document formatting: A4 Document, all margins: 2,5 cm.

Headlines. For the first page as it is shown in the example, but the number of journal, the volume, issue and the years of publishing will be specified by publisher. On the left of even pages – page number, on the right – authors (in the format: Name Initials. Surname, etc.). On the left of odd pages – title of the article (shortened version allowed), on the right – page number. For present instruction page numbering is exemplary. Final numbering will be specified by publisher.

Decimal numbering should be used for the paragraph's titles, figures, equations and tables, as well as literature positions. Continuous numbering. Placing in the text of an article appropriate references to the bibliographic positions presented at the end is advisable. Literature references should be specified in square brackets, e.g. [2,8-10].

The text of an article should be divided onto chapters and subsections –2 space lines 12 pt. before each chapter, 1 space line 12 pt. after each chapter; subsection titles – 1 space line 12 pt. before each subsection, after each subsection 1 space line 12 pt.

It is advised to use chapter numbering (1., 2.) and subsections as two-levels, i.e. 1.1, 1.2, 2.1.

Every article must contain conclusion or summary at the end and literature list afterwards.

The article is ended with the sentence containing the date of receiving the text to the publisher and the date of revised form acceptance. The concreted dates will be written by publisher.

At the end of article includes information about licence and symbol.

Publisher may insert separate departure from the advised rules (e.g. other than advised spaces between title and the text) in case of publishing need. The same might be applied to authors, but it should earlier be consulted with the publisher.

In case of any doubts please contact: [SJSUTST@polsl.pl](mailto:SJSUTST@polsl.pl) or [piotr.czech@polsl.pl](mailto:piotr.czech@polsl.pl).

#12#

### 2.1. Subsection title, bold text

#12#

For building equations Microsoft Equation Editor is being used. Basic font: Times New Roman, 12 pt, italic formatting. Number of equation with a straight font. Example of an equation:

$$C = q_p \cdot \int_{t=0}^{\infty} f(t) \cdot \alpha(t) dt \tag{1}$$

#12#  
#12#

### 3. TABLES, FIGURES

#12#

Every table should have it's own title. Horizontal test direction is preferred. Using vertical text direction will be acceptable exceptionally for large tables. In this case the table will be positioned on a separate page.

Tables and figures numbering must me continuous and one-level.

An example of table building is shown below for Tab. 1.

#12#

Tab. 1

The title of table (np. Values of critical gaps for small roundabouts with one-lane minor roads and different value of exterior diameter) – in English, CENTERED TEXT

#12#

Exterior diameter [m]	below 24	from 24 to 30	above 30 to 36	above 36
Critical gap [s]	5.0	4.8	4.6	4.5

#12#

#### 3.1. Graphics

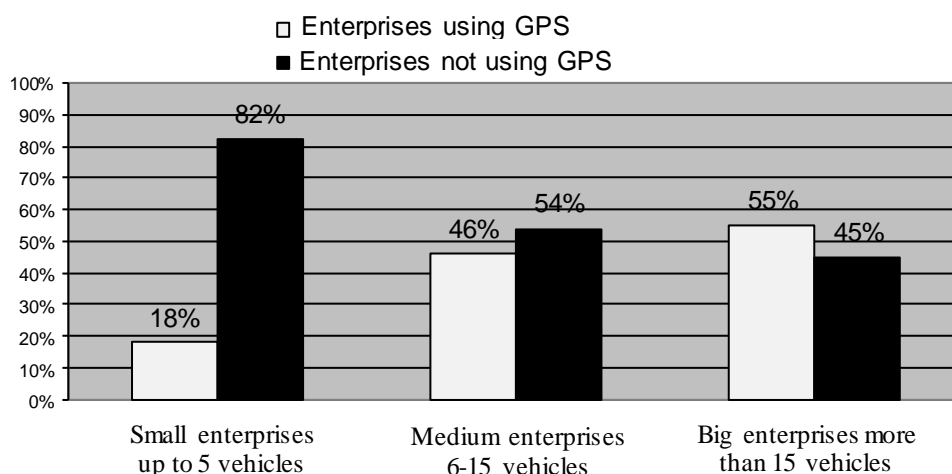

#12#

Images' graphic must be compatible with the Word program requirements. Figures should represent a grey-scale image. The quality of an image should be sufficient when it is readable.

The figure description in the text should be preceded with this figure and should be sufficient for its correct understanding. Titles placed under the figure, in English – for article in English or in Polish – for article in Polish. Font: 12 pt., align text left, single space lines.

An example of figure and its subtitles are shown in Fig. 1.

#12#

#12#

Fig. 1. Figure title (e.g. Fig. 1. Implementation of GPS in small, medium and large transportation enterprises) – in English, CENTERED TEXT

#12#

The figures may also be presented in several parts, i.e. a, b, c... In this case all the parts must be inserted on the same page and have one subtitle with explanation according to individual part of the picture.

#12#

#12#

#### 4. LITERATURE LIST

#12#

An example of building a literature list is shown below. Bibliography should be written next to a word – **References**, without giving the phrase – **4. LITERATURE LIST**. Title of books, articles, journals should be presented in accordance with the original. In the case of publications in languages other than English, you must add an English translation. Alphabetical order, no division into books, articles etc. (without the phrases – “Books, series and reports:”, “Journal article:”, etc.). **ALIGN TEXT LEFT, 12-POINTS**. The basic principles are consistent with the standards of ISO 690, PN-ISO 690 (Chicago system).

#### **Books, series and reports:**
