Information for Authors
(Rules and Procedures)

1. Submitting articles means that the author (with co-authors) agrees with all the requirements specified in the instructions for authors presented on the website of *Scientific Journal of Silesian University of Technology. Series Transport*.
2. Any article to be published in *Scientific Journal of Silesian University of Technology. Series Transport* must have been previously considered by the editorial board. Any mismatch between an article and the subjects' profile of the journal, blunders or mismatch between an article and the instructions for authors may result in publication being refused.
3. The thematic scope of the published articles concerns a wide range of transport problems, in particular, the issues of the technical means of transport (construction and technical exploitation), telematics solutions for supporting transport processes' realization, traffic engineering, transport infrastructure, planning transport systems, environmental protection, safety in transport, quality and effectiveness of transport, and transport law.
4. Articles published in this journal should contain new and original content.
5. Articles will not being accepted for publication that are very similar to previously rejected ones.
6. An identification number is assigned to each prepared and accepted paper. This identification number is used in correspondence with the author of the article.
7. Researchers who work in a different academic institution to the author (and co-authors), as well as the editorial board of the journal and international programming council, are invited to review articles. Any reviewer must be a recognized expert in the aforementioned field and/or an independent academician with a docent or professorial rank. Persons who are in a close relationship with the author will be excluded as reviewers.
8. Reviewers are selected in accordance with the principle of avoiding any conflict of interest. Examples of conflicts of interest include a personal relationship between reviewer and author, occupational subordination, and direct scientific cooperation over the last two years prior to the review.

9. All the papers published in the journal are reviewed and printed after obtaining two positive reviews.
10. Each review candidate first receives the abstract of the paper without any information about the author. On the basis of the abstract and any information about the volume of the paper, the candidate then decides how the review will be executed.
11. A review should be written in English on the review form submitted by the editorial office. This review can be written in another language with the consent of the editorial board.
12. The contract with the reviewer establishes the requirements for rigor, details of the review and execution time. Reviewers receive no remuneration for a review.
13. Reviewers, through exclusive mediation by the editorial board, can contact the author for additional data (e.g., experimental) that were used in writing the article.
14. The review is provided in written form and concludes with an explicit recommendation to either accept or reject the paper for publication.
15. An additional reviewer is assigned in the case of a negative review.
16. The editorial board may refuse to accept a review, unless it complies with the requirements of the contract.
17. In the case of diametrically opposite assessments from the selected reviewers, the final decision is made by the editorial board.
18. The author receives a text of the review without any information about the reviewer.
19. The review process is confidential until the decision about the acceptance or the rejection of the article.
20. The review is carried out using a “single-blind review process” or “double-blind review process” (since 2015).
21. After a decision to accept an article has been made, the author is obliged to make adjustments indicated by the reviewer.
22. Minor and insignificant corrections of an editorial nature may be made by the editorial board without the author’s involvement.
23. All reviewers have the right to re-verify the article before it is printed.
24. A list of reviewers is published in the last issue of the journal every year, as well as on the website.
25. The editors decide about the issues relevant to the journal in which any article is published.
26. To prevent any misconduct in science (ghostwriting, guest authorship), the editorial board has introduced appropriate procedures. Ghostwriting is when someone has made a substantial contribution to the article, but neither their part as one of the authors has been disclosed, nor mentioned in the acknowledgments of the publication. Guest authorship is when the named author’s contribution is negligible or even non-existent, even though their name is listed as an author or co-author.
27. Editors will explain the concept of ghostwriting and guest authorship, as manifestations of scientific misconduct to authors, and any detected cases of these types of action on the part of the authors will be revealed, including the notification of the appropriate entities.
28. Editors will require any contributions from authors in the creation of the article (with their affiliation and information about who the author of the concept is, objectives, research etc.). The primary responsibility will be borne by the person submitting the article. In the case of any absence of information about unequal contributions on the part of the authors, it will be assumed that the share is equal.
29. Editors will obtain information about the sources of publication funding, contributions from research institutions and other entities (financial disclosure). The primary responsibility will be borne by the person submitting the article.
30. Editors will document all forms of scientific misconduct, especially breaking the rules of conduct that is obligatory in science.
31. Editors try to avoid autocitations of article authors and our journal autocitations.

32. Authors of publications in the journal do not receive an honorarium. They must also agree with the publication of articles in the printed version of the journal and the Internet version. The printed form is the original version.
33. The journal is indexed in international databases.
34. The journal has assigned a DOI number. The use of a DOI number in the bibliography improves the traceability of the article on the Internet and increases the impact of the respective citation.
35. Responsibility for the use of photographs and drawings in the sent materials of articles rests with the authors.
36. No charge will be levied on an author in order to process or publish a paper.
37. The full texts of the articles of the journal are freely available on the journal's website.
38. Users are allowed to read, download, copy, distribute, print, search or link to the full texts of the articles in this journal without asking prior permission from the publisher or the author. This is in accordance with the BOAI definition of open access.
39. The journal allows the authors to hold the copyright without restrictions. The journal will allow the authors to retain publishing rights without restrictions.
40. Google Scholar digitizes, stores and hosts volumes of journals. The related processes can be carried out by other institutions.
41. The Interdisciplinary Centre for Mathematical and Computational Modelling, at the University of Warsaw in Poland, and BazTech digitize, store and host volumes of journals as an external repository for the journal.
42. The National Library of Poland is another external repository for the journal.
43. Articles are licensed under a Creative Commons Attribution 4.0 International License (CC BY 4.0).
44. The journal is published as open access. This means that the results of research are freely available to a wide range of interested readers and allows for a global exchange of knowledge.
45. Publisher copyright policies and self-archiving are defined as "green colour" in SHERPA/RoMEO.
46. The journal has a policy of screening for plagiarism. The authors must only present for publication their own original articles, which have not been published previously as a whole or in significant parts of any other copyrighted content. The authors guarantee that any article submitted for review has not also been submitted for publication in another journal, collective work etc. The degree of originality article that authors are obliged to inform the editorial board about are in the appropriate statement. Authors must indicate (cite) publications that have been used in the creation of the article. Editors indicate that all detected cases of unethical behaviour will be unmasked, including notification of the relevant actors (institutions employing the authors, learned societies, associations, scientific editors etc.). Editors document any manifestations of scientific misconduct.
47. The journal has a policy of ethical principles based on COPE's *Best Practice Guidelines for Journal Editors*, including inter alia principles of fair play, confidentiality, preventing conflicts of interests on the part of editorial board members, reviewers participating in the work of the editorial board, timeliness, confidentiality, preventing conflicts of interest on the part of reviewers, reliability of sources, preventing conflicts of interest on the part of authors, fair presentation of research reports, originality of work, fairness sources and errors in the published work.
48. Since volume 91, all published articles have been in English. In addition, all articles have been subject to a proofreading procedure by professional proofreading services.
49. In order to unequivocally identify authors, Open Researcher and Contributor ID (ORCID) have been mandatory since volume 109.
